

## ***XelARATION Software Corporation***

---

### **Mission**

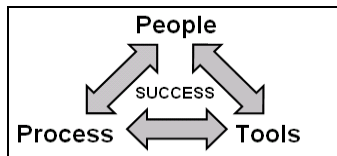

To accelerate the success of our customers in improving their software engineering capabilities enabling them to achieve their business goals.

---

### **Profile**

In this day and age, most corporations realize the importance of software in achieving business success. They also realize the importance of applying rigor and discipline in developing software to deliver on-time and on-budget with the agreed-upon scope and the right level of quality. Nevertheless, many of these organizations struggle with the implementation of new processes and tools aimed at improving their software engineering capabilities. This is where XelARATION Software can help.

Founded in 2003, XelARATION Software has earned a solid reputation in ensuring its customers achieve their software engineering capability improvement goals. XelARATION Software helps organizations accelerate the achievement of these goals by providing solutions for: People, Process and Tools.

XelARATION Software acts as a catalyst with its team of highly skilled consultants by:

- Training and coaching people on processes, techniques and tools
- Implementing the right software engineering processes
- Automating software engineering processes with the right tools

XelARATION Software offers the following services and products:

- Independent assessment of the software engineering capabilities of a project or an organization
- Processes and tools implementation services
- Training, coaching and consulting on processes, techniques and tools
- Extensions to the Unified Process
- Software engineering templates

With its high-performance team of consultants and extended team of partners, XelARATION Software provides its customers with a wide range of solutions that cover the entire spectrum of software engineering:

- Software Engineering Management
- Business Analysis and Requirements Engineering
- Architecture, Design and Development
- Test Management and Quality Assurance
- Configuration and Change Management
